

Dear Members,

Hopefully you had a happy and safe 4th of July weekend. Thanks to the Ski Club for putting on another great show and I hope everyone enjoyed the Fireworks. In recent years, Public Safety has been a major focus. This years holiday weekend went off with very few incidents and the staff is very grateful to the membership. IDNR was on the lake over the weekend as well and they were very satisfied. Just a reminder, make sure you have all your required equipment on your boats. They are checking.

As a reminder, the membership approved the purchase of the North End a few years ago. The 319 Project is set to resume in mid-July. We will be putting in 2 new silt retention basins and riffle dams. Based on engineer estimates, this should greatly reduce the amount of silt entering in our lake at the north end. We also need to continue to meet our financial obligations as well. If you're in the market for an association lot, please contact the office or your local real estate agent.

And one final reminder, please make sure to vote on the proposed Covenant changes. Early responses have been good. It's very important for everyone to vote. If you have questions, please contact any Board member or the Staff. We are happy to answer them. Our goal is to get all votes in by Jan 1st.

Best Regards,
Scott Webber
President
