Manager's Report by Rob Clarkson

The Lake remains at full pool and our water quality is excellent. We will be heading into the official kick off of the boating season with a lake that is at full pool. I would like to remind everyone that boat stickers expired April 30th so be sure to get this year's sticker and avoid any unwanted correspondence from my staff. The Marina Ramp Cable lock has been changed and utilizes a key that cannot be removed until the lock has been secured. Lets all do our part to secure the lake from non-members.

Spring clean-up is being conducted thru out the Community and we want to thank you for the great effort. Overall grass is being mowed, repairs to homes, decks, sheds and docks is being conducted and our Community is well kept. There are a few exceptions and we will bring this to the attention of the offenders. We all want a common sense approach to maintenance of property which is; mow the grass and keep all structures in an as built status.

Soon the lake will be busy with families trying to enjoy warmer weather. Know the rules before heading out on your PWC or any watercraft to ensure everyone's safety this boating season. Public Safety will be patrolling and watching for compliance of all boating rules. Non motorized watercraft such as Kayaks and Paddle Boards require Holishor decals and lot numbers affixed to them. The office will be happy to assist in obtaining these decals and offer you a current set of boating rules. If you are unable to come to the office you can find the latest version of our rules on the web site www.holidayshores.us

Plan to build a new deck, add a pool, garage, or shed? Make sure you obtain the proper permits prior to starting your projects. Building committee meets 1st and 3rd Tuesday of the month. Plans need to be submitted before noon the Friday preceding the meeting date.

Volunteers are the key to strong communities. Join the social club, garden club, or any of the various committees and make a difference in your community. Board of directors meetings are held the 2nd and 4th Wednesday of the month in the Club-house Ballroom at 7:30 pm.

2021 Board of Directors Election Results

June 26 & 27 - Heartland Veterinary Hospital Summer Classic

Entry Fee \$50/boat 6am-2pm both day

Remember everyone needs an Illinois fishing license to fish the lake, 2020 expired on March 31, 2021.

We hope to see everyone on the water!!

Any questions? Email us at tbbchs@gmail.com

Hey everyone, it's time for the Heartland Veterinary Hospital Summer Classic which is being held on June 26 and 27 this year. We are looking for sponsors for this two-day event. This tournament has raised over \$29,000.00 which the bass club has used to place structure & help with the supplemental stocking of the lake above the monies that the association puts in annually. This lake is the main reason everyone moves here, whether it's for fishing, boating or just water fun. The bass club tries to do our part by doing what we can. If you would like to be a part of this great tournament and have your business or your family name shown on the sponsor board all weekend at the Holiday Shores Marina please contact us by email or speak with a bass club member. There are 4 different levels of sponsorship, Platinum \$250.00 & up, Gold \$200.00, Silver \$100.00 and Bronze \$50.00. Of the sponsorship money collected, half of it goes back into the lake for fish structure and supplemental fish stocking with the other half going into the tournament purse. If you are interested in fishing this tournament the entry fee is \$50.00 per boat. The boat must be registered and have a 2021 Holishor Association decal and at least one team member must be in good standing with the Holishor Association. Plus, both team members must pay a \$25.00 membership fee with the Tiki Bar Bass Club if they are not already members.

Some members from the bass club went to the Lake of the Ozark in April to try to win \$100,000.00 for the biggest fish in the Big Bass Bash. Sad to say none of them won the big money but, Justin Lowry, Mark Dowdy, Mitch Dowdy, Shawn Jennings and Dave Mckeown caught fish that got them checks.

Old Business

Roadway Improvement Proposal

Jerry Allen At the Board's executive session on March 24, 2021, the Association attorney stated that per the current bylaws, multiple lot owners could not be assessed fees based on each property they own. After the Roadway Improvement Committee (RIC) was notified of the Association attorney's opinion, Jane Unsell, who is a member of the RIC and an attorney, reached out for clarification.

Per the two attorneys' conversation, the following was revealed:

1. The Association attorney had not been asked to review the RIC proposal.
2. The Association attorney was asked only to review the current bylaws to confirm whether a multiple lot owner could be assessed fees based on each property owned. The Association attorney's opinion shared to the Board was that a multiple lot owner could contest said fees and if contested, the Board would not be able to collect per the current bylaws.

It is the committee's opinion that since the RIC proposal is an amendment to the current bylaws, a vote by the membership would be required to approve the amendment. Once the Amendment is approved by the association, the committee believes that a multiple lot owner could not contest a separate assessment based on road frontage ownership.

Based on the current state of the proposal, membership communication and education necessary for this amendment to pass, the RIC has decided to retract its proposal for consideration at the 2021 Annual Meeting.

If there are any members who would like to participate on this committee or have ideas for increasing revenue for our roadways, please feel free to reach out to me. We appreciate your comments and suggestions.

I want to personally thank the committee members for their countless hours of work and dedication to this effort. The committee members beside myself are: Kay Slayden, Jane Unsell, Cindy Rives and Patti Brown. It should be noted that two of the RIC members are multiple lot owners. **John Crotty** Any questions or comments for Jerry?

Tony Harris Are they looking to make another proposal you think. **Jerry Allen**

Yes, I think what we're going to do is reconvene and see what we need to do.

Again, looking at the communications and I think one of the things that we were having issues with was education of our membership on the benefits of the actual proposal is. So we're going to work on that, and how we can get the communication out in a better manner. But we also want to see if there's people in the membership who'd be like to be part of the committee so that we could perhaps get some different ideas or just have some different input to the to the overall proposal. **Tony Harris** The covenants and the bylaws are obviously changeable, but you would have to change a significant portion of the bylaws. Pretty much the whole concept, understanding that it's a membership-based community to go forward with the current proposal. So you'd be changing a large portion of those to do that. **Jerry Allen** Well, the attorney that we had on the committee reviewed the bylaws and thought that the proposal we put forth would fall within the bylaws even though it's an amendment to those. Again, our association attorney reviewed what he was asked to review which was the current bylaws versus the amendment that the proposal is based on. So anyway, we're going to retract it for 2021 and hope to have something coming up for the for the upcoming Annual Meeting in 2022.

Culvert-Ensign Circle

Rob Clarkson I received bids for the culvert replacement on Ensign Circle from Stutz Excavating and Kamadulski Excavating Companies. Stutz was the low bidder at \$2360.00 and was awarded the contract to perform the work. They should have that completed within the next couple of weeks. **Tony Harris** Is that just the

HOLIDAY SHORES Garden CLUB NEWS

By: Joyce Brendle

www.holidayshores.us/garden-club

This month's meeting is the annual Holiday Shores Garden Tour scheduled on Monday, June 21. We will meet on the clubhouse parking lot at 6:00 p.m. to carpool. Following the tour, we will return to the clubhouse for our business meeting and refreshments. This particular meeting is always a highlight! Visitors are welcome and encouraged to attend any of our meetings.

The photos below feature last month's Annual Plant Sale at the Firehouse. Our flower resource is Bloomer's Botanicals in Highland IL. All the perennials are from the gardens of club members. Once again, our Holiday Shores community showed up in a big way to support this event. It was highly successful and allows us to continue our beautification efforts throughout the area. THANK YOU!!!

Flower Pickup Crew at Bloomer's Botanicals

Morning Setup Crew at Firehouse

Canopy Setup Crew at Firehouse

Ready for Business!!!

For those volunteers interested in helping at the Native Plant Project this month on Biscay, please mark your calendars for Wednesday, June 2 – 6:00 p.m. to 7:00 p.m. and Saturday June 19 – 8:00 a.m. to 9:00 a.m. The recruitment ad for community volunteers can be found elsewhere in this issue.

Garden Tip: Hybrid tea roses, grandiflora and floribunda roses, all need to be fertilized about once a month into July. Timing of applications should correspond to the completion of bloom cycles. A deep watering each week is important; 1 – 1-1/2 inches.

Native Plant Project May Cleanup

KIDS COLORING CONTEST AGES 10 & UNDER

Please bring your completed coloring page into the office by June 30, 2021 and receive a small prize. Winner will receive \$25. 10 & Under.

Annual Water Quality Report for the period of January 1 to December 31, 2020

This report is intended to provide you with important information about your drinking water and the efforts made by the water system to provide safe drinking water.

The source of drinking water used by
HOLIDAY SHORES SD is Surface Water

For more information regarding this report contact:

Name Kenneth A. Dulle

Phone (618) 656-4933

Este informe contiene información muy importante sobre el agua que usted bebe. Tradúzcalo o hable con alguien que lo entienda bien.

Source of Drinking Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.

- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population.

Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Source Water Assessment

We want our valued customers to be informed about their water quality. If you would like to learn more, please feel welcome to attend any of our regularly scheduled meetings. The source water assessment for our supply has been completed by the Illinois EPA. If you would like a copy of this information, please stop by City Hall or call our water operator at (618) 656-4933. To view a summary version of the completed Source Water Assessments, including: Importance of Source Water; Susceptibility to Contamination Determination; and documentation/recommendation of Source Water Protection Efforts, you may access the Illinois EPA website at <http://www.epa.state.il.us/cgi-bin/wp/swap-fact-sheets.pl>.

Source of Water: HOLIDAY SHORES SD Illinois EPA considers all surface water sources of community water supply to be susceptible to potential pollution problems; hence, the reason for mandatory treatment for all surface water supplies in Illinois. Mandatory treatment includes coagulation, sedimentation, filtration, and disinfection. Primary sources of pollution in Illinois lakes can include agricultural runoff, land disposal (septic systems) and shoreline erosion.

2020 Regulated Contaminants Detected

Lead and Copper

Definitions:

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.

Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	09/19/2019	1.3	1.3	0.082	0	ppm	N	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead	09/19/2019	0	15	5.4	0	ppb	N	Corrosion of household plumbing systems; Erosion of natural deposits.

Water Quality Test Results

Definitions:

The following tables contain scientific terms and measures, some of which may require explanation.

Avg:

Regulatory compliance with some MCLs are based on running annual average of monthly samples.

Level 1 Assessment:

A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

Level 2 Assessment:

A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

Maximum Contaminant Level or MCL:

The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal or MCLG:

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Water Quality Test Results

Maximum residual disinfectant level or MRDL:

The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum residual disinfectant level goal or MRDLG:

The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

na:

not applicable.

mrem:

millirems per year (a measure of radiation absorbed by the body)

ppb:

micrograms per liter or parts per billion - or one ounce in 7,350,000 gallons of water.

ppm:

milligrams per liter or parts per million - or one ounce in 7,350 gallons of water.

Treatment Technique or TT:

A required process intended to reduce the level of a contaminant in drinking water.

Regulated Contaminants

Disinfectants and Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Chlorine	12/31/2020	0.9	0.54 - 2	MRDLG = 4	MRDL = 4	ppm	N	Water additive used to control microbes.
Haloacetic Acids (HAA5)	2020	39	10.9 - 41.3	No goal for the total	60	ppb	N	By-product of drinking water disinfection.
Total Trihalomethanes (TTHM)	2020	68	38 - 75.1	No goal for the total	80	ppb	N	By-product of drinking water disinfection.
Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Arsenic	2020	2	1.5 - 1.5	0	10	ppb	N	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.
Barium	2020	0.02	0.02 - 0.02	2	2	ppm	N	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.

Sweet Treats for Summer

ADD A LITTLE SWEETNESS TO ANY OCCASION

(Culinary.net) It's almost impossible to beat the combination of sweet fruit and decadent desserts. This delicious recipe for Apple Cake highlights the crisp fruit but also the cinnamon sugar-flavored pastry. It's luscious but doesn't overdo it on the sweet meter with just the right mix of flavors.

The cake is baked with the apples inside as the middle layer, which creates a moist, finished product. The apples are gooey, baked in a cinnamon sugar coating, making them a sweet and light complement to the perfectly baked cake.

Start by mixing the apples with cinnamon and, of course, sugar. Set the mixture aside. Now it's time for cake. First, mix all the dry ingredients together then mix in the wet ingredients.

The secret to this cake is creating layers that will hold up. Pour half of the batter into a round springform pan first then add apple mixture and top it all with the rest of the cake batter.

Finally, for a little extra sweetness, sprinkle 1 tablespoon of sugar over the top of the cake before baking.

Once baked, this cake can be drizzled with icing (if you'd like) to make it an even more delightful treat to satisfy any sweet tooth.

This cake is perfect for any get-together, families looking for an after-dinner indulgence or anyone who just loves fruity desserts. It's delectable enough for fancy occasions, but also simple enough to make at home for just a couple.

With fluffy cake layers and a soft apple center, this cake does it all. Not to mention the drip of icing at the end that all but guarantees everyone will be asking for seconds.

Find more recipes and sweet desserts at Culinary.net.

APPLE CAKE

Servings: 8-16

3 cups Honeycrisp apples, peeled, cored and diced
3 teaspoons cinnamon
6 tablespoons, plus 2 cups, sugar, divided
3 cups flour
3 teaspoons baking powder
1 teaspoon salt
1 cup oil
4 eggs, beaten
¼ cup orange juice
1 teaspoon vanilla
icing (optional)

Heat oven to 350 F.

In medium bowl, mix apples, cinnamon and 5 tablespoons sugar until combined. Set aside.

In large bowl, mix flour, 2 cups sugar, baking powder and salt until combined. Form well in middle of mixture. Add oil, eggs, orange juice and vanilla; mix until blended.

In springform pan, pour half of batter. Add apple mixture. Pour remaining batter over apple mixture. Sprinkle remaining sugar over batter.

Bake 40-50 minutes, or until top is golden brown and tester comes out clean and dry.

Drizzle with icing, if desired.

PEANUT BUTTER PERFECTION

(Culinary.net) If you've ever taken a bite of something and the only word that came to mind was "yum," you know what it's like to experience this dessert. It's fluffy, sweet, perfectly crumbly and tastes delicious. It's rich but light. It's a dessert that will likely never go out of style. You can stop guessing what it may be: this treat is a scrumptious bite of Fluffy Peanut Butter Pie drizzled with chocolate syrup. You will understand the craze once you sink your fork into the chilled triangle resting on your plate. With a chocolate cookie crust and a thick, delicious peanut butter filling, this pie is everything many people want in a dessert.

Although it tastes like you have been in the kitchen all day, it's a simple-to-make, delightful treat with luscious peanut butter flavor that melts in your mouth. To make this pie, remove the filling from 20 chocolate cookies and crush them with a rolling pin until they are just crumbs. Mix cookie crumbs with melted butter and mold into a pie dish to create the crust.

Next, in a mixer, combine cream cheese and reserved cookie filling. Then add sweetened condensed milk, peanut butter, lemon juice and vanilla extract while you continue mixing.

In a mixing bowl, beat whipping cream until stiff peaks form. Fold peanut butter mixture in with the whipping cream.

Layer the peanut butter and whipping cream mixture on top of the crust in the pie pan. Chill for about 4 hours then drizzle with chocolate syrup just before serving. This dessert is perfect for anyone with a sweet tooth. House guests, birthday parties or even just a simple treat after a meal; it's an any-occasion kind of pie. Find more dessert recipes at Culinary.net.

FLUFFY PEANUT BUTTER PIE

Servings: 6-8

20 chocolate cream-filled cookies
¼ cup butter, melted
1 package (8 ounces) cream cheese, softened
1 cup smooth peanut butter
1 can (14 ounces) sweetened condensed milk
3 tablespoons lemon juice
1 teaspoon vanilla extract
1 cup whipping creamchocolate syrup

Remove cream filling from chocolate cookies; set aside. With rolling pin, finely crush chocolate cookies. In medium bowl, combine finely crushed cookies with melted butter.

Press crumb mixture firmly into bottom and sides of 9-inch pie plate; chill while preparing filling. In large bowl, beat cream cheese until fluffy. Add reserved cookie cream filling, peanut butter and sweetened condensed milk; beat until smooth. Stir in lemon juice and vanilla extract. In medium bowl, beat whipping cream until stiff peaks form. Fold whipped cream into peanut butter mixture. Mix until combined. Pour into crust. Chill 4 hours, or until set. Drizzle chocolate syrup over pie before serving. Cover leftovers and store in refrigerator.

DELECTABLY SWEET DESSERT

(Culinary.net) If you're looking for an easy dessert, this Whoopie Pie recipe is the perfect way to cap off weeknight meals. Find more dessert recipes at Culinary.net.

WHOOPIE PIES

Servings: 2-4

1 box spice cake mix
1 1/2 cups apple butter
1/2 cup canola oil
2 eggs
8 ounces cream cheese
4 tablespoons butter
3 cups powdered sugar
2 tablespoons milk
1 teaspoon vanilla

Heat oven to 350 F.

Line baking sheet with parchment paper.

In large bowl, whisk spice cake mix, apple butter, oil and eggs.

With ice cream scoop or large tablespoon, spoon batter into rounded heaps, about 2-3 inches in diameter, onto parchment paper. Space spooned batter 2 inches apart. Bake 14 minutes. Let cool.

In large bowl, beat cream cheese, butter and powdered sugar until smooth. Add milk and vanilla; beat until blended.

Frost flat sides of pie halves and place halves together.

Refrigerate and store in sealed container.

Continued from Page 7

a friend that lives here in Holiday Shores, Brad Krome. He had mentioned about the downstairs property for rent. So that's why we came and checked it out and we have an interest of proposing a package liquor store with a bar with a little bit of like food if you guys would approve it. **Tony Harris** So the one thing that I noticed on here, number 5 is the ability to offer gaming as an entertainment. Historically, as people have asked that we pretty much deny that. We don't think that is what we really want in the restaurant. So that's probably a no go. Just to let you know about that one. And then currently, we're in negotiations with another party. So if that happens to fall through or something, we would definitely get back to you and follow up. Right now we're kind of in the middle of that so we can't start a second negotiation till we see what happens with it. **T.J. Patel** How soon you think you'll have an answer? **Tony Harris** Probably a meeting or two. We meet every other week, obviously so I would say two to four weeks we'd probably have a good feel. **T.J. Patel** Mid May. So should I check back with you. **Tony Harris** Did you guys meet with Steve Yates or someone on the restaurant committee? **T.J. Patel** We walked in, I think Rob Frey showed us the property downstairs, **Tony Harris** They have your contact information. **T.J. Patel** No, our contact information is on the letter there. **Tony Harris** So we can just let you know, that way you don't have to keep following up with us, you don't have to wonder. We can just get back with you after we know about the first negotiations. **John Crotty** Someone from the board or the restaurant committee will reach out to you.

Variance Request-Culver 1601 Waikiki

They are requesting to not put the culvert in, and the building committee does recommend the variance. **Mike DeConcini (1601)** I got pictures of it if you want to see it. **Jerry Allen** I drove that street today and I would have to agree with the building committee that we should be able to grant the variance based on what I saw.

Matt Ressler Makes a motion to grant this variance as submitted.

Rob Clarkson Generally you put on there that if it's ever ditched and needs a

culvert in it's the responsibility of the homeowner. **Tony Harris** Yes, that was the point I saw missing from the building committee, they usually had that added. I would think we want that kind of language in there. **Matt Ressler** Are you fine with that. **Mike DeConcini (1601)** Yeah, I don't have a problem with that. **Matt Ressler** Makes a motion to grant this variance as submitted with a stipulation if it is every ditched and needs a ditch or culvert in the future it is the responsibility of the homeowner.

Dan Hopkins Seconds

All in favor

Motion carries

Open Floor

Roger Rawson (1851) On the fireworks are we still paying the same amount, like \$16,000? So when I got here 22 years ago, the fireworks were like an hour long. I think last year, they were 14 minutes. I've been timing them over the years, and I noticed they started getting shorter. So I guess my question is do we need to start thinking about the future. Either increasing the amount of money we spend, or it's just going to get to where it's going to be a five-minute show and it's not going to be very impressive. **Tony Harris** I didn't time it last year, I would have thought it was a little more than that, but I didn't actually time it so I can't say.

Roger Rawson (1851) I think the year before it was like 15 or 16 minutes. So because I know we're paying the same amount and we're getting less and less because of the increase in costs. **Tony Harris** I don't have the quantities of what we've had in prior years. This one looked like a pretty good number. **Roger Rawson (1851)** I think we've been paying the same amount since I've been here. It's always been an impressive show years before, just something for you guys to consider. **Tony Harris** It is something to consider, thanks, Roger. **Jeremy Jasudowicz (1041)** I have a culvert going across on the corner of Mexico and Acapulco. And I addressed this in 2019 about eroding and having a possible culvert installed there on that corner. Because that current culvert is about 25-30

PERSONAL FLOTATION DEVICES

PLEASE READ THE IMPORTANT INFORMATION BELOW REGARDING PERSONAL FLOTATION DEVICES. IT IS IMPERATIVE THAT THE APPROPRIATE PFD IS KEPT ON EACH WATERCRAFT WHILE BOATING ON HOLIDAY LAKE AND SU TWAN LAKE. THIS INFORMATION CAN BE FOUND ON PAGES 9 AND 10 IN YOUR HOLIDAY SHORES BOATING RULES.

Personal Flotation Devices from 625 ILCS 45/4 1 No person may operate a watercraft unless at least one U.S. Coast Guard approved PFD of the following types or their equivalent is on board for each person: Type I, Type II or Type III. No person may operate a personal watercraft or specialty prop craft unless each person aboard is wearing a Type I, Type II, Type III or Type V PFD approved by the United States Coast Guard. No person may operate a watercraft 16 feet or more in length, except a canoe or kayak, unless at least one Type IV U.S. Coast Guard approved PFD or its equivalent is on board in addition to the PFD's required in paragraph A of this Section. A U.S. Coast Guard approved Type V personal flotation device may be carried in lieu of the Type I, II, III or IV personal flotation device required in this Section, if the Type V personal flotation device is approved for the activity in which it is being used. When assisting a person on water skis, aquaplane or similar device, there must be one U.S. Coast Guard approved PFD on board the watercraft for each person being assisted or towed or worn by the person being assisted or towed. No person may operate a watercraft unless each device required by this Section is: Readily accessible; in serviceable condition; of the appropriate size for the person for whom it is intended; and legibly marked with the U.S. Coast Guard approval number. Approved personal flotation devices are defined as follows:

- Type I A Type I personal flotation device is an approved device designed to turn an unconscious person in the water from a face downward position to a vertical or slightly backward position and to have more than 20 pounds of buoyancy.
- Type II A Type II personal flotation device is an approved device designed to turn an unconscious person in the water from a face downward position to a vertical or slightly backward position and to have at least 15 1/2 pounds of buoyancy.
- Type III A Type III personal flotation device is an approved device designed to keep a conscious person in a vertical or slightly backward position and to have at least 15 1/2 pounds of buoyancy.
- Type IV A Type IV personal flotation device is an approved device designed to be thrown to a person in the water and not worn. It is designed to have at least 16 1/2 pounds of buoyancy.
- Type V A Type V personal flotation device is an approved device for restricted use and is acceptable only when used in the activity for which it is approved.

No person may operate a watercraft under 26 feet in length unless a Type I, Type II, Type III, or Type V personal flotation device is being properly worn by each person under the age of 13 on board the watercraft at all times in which the watercraft is underway; however, this requirement shall not apply to persons who are below decks or in totally enclosed cabin spaces. The provisions of this subsection I shall not apply to a person operating a watercraft on private property.

Further, no person may operate a watercraft on Holiday or Su Twan lakes unless a Type I, Type II, Type III, or Type V personal flotation device is being properly worn by each person under the age of 13 on board the watercraft at all times in which the watercraft is underway.

Garden Club Native Plant Community Project

(Located at the Silt Pond, North End of Lake on Biscay Drive)

Garden Club continues to seek community volunteers to assist with the Native Plant Community Project. We need **YOU** to work with us and others as we restore this natural area at the north end of the lake.

Native Plants are Perennials

After established and mulched, they require no watering and never need spraying. They provide excellent erosion control and are very colorful all season. They attract songbirds, butterflies, and pollinators....all beneficial to the environment.

Work days are the third Saturday of April through October at 8:00 a.m. until

9:00 a.m. **AND**, on the first Wednesday of the month from 6:00 p.m. until 7:00 p.m. A time commitment of just one hour per month will make a huge impact. Men, women, and children with adult supervision are welcome. Make it a family affair!!

Please consider adding your name to our list of volunteers for this project, or, simply drop by on one of the work days. We would enjoy meeting you!

Summer Skin Protection -- Inside and Outside

(StatePoint) Many people prioritize skin protection when spending time outdoors, but skin damage from UV rays and free radicals can occur inside too. Consider these tips and insights this summer:

Indoor and Outdoor Hazards

If you're already taking measures to protect skin while outdoors, that's great. The sun is responsible for up to 90% of visible skin changes commonly attributed to aging, according to the Environmental Protection Agency. But you don't have to be at the pool or beach to be susceptible to sun damage. Whether you're driving your car or you're inside your home, it's important to keep in mind that your skin can be exposed to free radicals from the sun's rays through windows. What's more, blue light from digital screens -- ubiquitous these days -- can also be harmful to skin. Additionally, damaging free radicals can be generated by pollution, certain foods, like those with a high glycemic index and red meat, exercise, alcohol and more.

Topical Care

Be sure to apply a topical SPF daily to your face and body. Keep in mind that some fabrics don't offer complete protection, so wearing sunscreen even on areas of skin that are not directly exposed to sunlight is a good idea. You can offer additional protection to sensitive areas like your scalp by wearing a hat. And of course, take good care of your eyes with sunglasses featuring UV blocking.

Double Up

Ultimate skin health comes from a combination of defensive layers. Double down on your skin's health from the inside out with a daily supplement, such as Heliocare Daily Use Antioxidant Formula. Eighty-seven percent of U.S. dermatologists recommend taking Heliocare to help protect skin from free radicals, like those produced by the sun's UV rays. Dermatologist-recommended, this natural, dietary supplement contains 240 milligrams of a powerful antioxidant formula derived from the extract of Polypodium leucotomos (PLE), a tropical fern native to Central and South America that's been used for centuries as a remedy for skin-related

conditions. Unlike other skincare supplements that contain PLE, Heliocare has a clinically-established, proprietary antioxidant formula, Fernblock PLE Technology, which aids in eliminating free radicals in the body.

"Ultimately, no one is immune to skin damage. Taking a supplement like Heliocare each day is an excellent precaution to help your body protect itself from the damaging effects of free radicals," says New York-based dermatologist, Rachel Nazarian, MD. "By neutralizing the outcome of these harmful atoms, it can help to promote a healthy appearance of skin."

To learn more and to access additional skin care information, visit heliocare.com.

To help keep skin healthy and radiant, avoid free radical damage in the first place and prioritize a comprehensive skin care routine, even when indoors!

Fluoride	2020	0.6	0.611 - 0.611	4	4.0	ppm	N	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Manganese	2020	2	2.3 - 2.3	150	150	ppb	N	This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.
Nitrate [measured as Nitrogen]	2020	0.05	0.05 - 0.05	10	10	ppm	N	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.
Sodium	2020	10	9.7 - 9.7			ppm	N	Erosion from naturally occurring deposits. . Used in water softener regeneration.

Turbidity

	Limit (Treatment Technique)	Level Detected	Violation	Likely Source of Contamination
Highest single measurement	1 NTU	0.039 NTU	N	Soil runoff.
Lowest monthly % meeting limit	0.3 NTU	100%	N	Soil runoff.

Information Statement: Turbidity is a measurement of the cloudiness of the water caused by suspended particles. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration system and disinfectants.

Total Organic Carbon

The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set, unless a TOC violation is noted in the violations section.

BEACH AND SWIM SAFETY

Holiday Shores Regulations

1. Beaches located within the Association are restricted to members and guests only.
2. Glass bottles, fires, pets and food are prohibited from the beach area.
3. Persons under the age of 16 are allowed to swim: if being escorted by an individual 17 years of age or older or there is a lifeguard on duty.
4. During each shift, a lifeguard is allowed a ten-minute break every hour, during that time, swimmers under 17 years of age must exit the water, if not with an adult.
5. Holishor Association Inc. is not responsible for one's personal items, nor any personal injury sustained while using Association facilities. (water, beach, grounds, etc.)

IL Dept. of Public Health Regulations

1. Beach water is not intended, nor fit, for human consumption. Do not swallow beach water.
2. Beach admittance may be denied to individuals having:
 - Contagious diseases
 - Infections (foot infections, ear infections, vomiting, diarrhea, inflamed eyes, unhealed abrasions or lacerations, skin lesions, or bandages of any kind.
3. Persons under the influence of alcohol or behaving erratically will be denied access/removed from the beach.
4. No food, drink, gum or tobacco products are permitted in the swim area.
5. The use of glass containers is strictly prohibited.
6. Children who are not toilet trained must wear tight fitting plasticized/rubber swim pants.
7. Swimming alone is discouraged.
8. Diving in shallow water is prohibited.
9. Personal conduct that endangers the safety of ones' self, or other beach patrons, is strictly prohibited.
10. Swimming is permitted between sunrise and sunset, except during the times of thunder and/or lightning. Swimmers are required to exit the water during these conditions and remain out for a minimum of 30 minutes following the last detection of thunder or lightning.
11. Pets are prohibited from the beach area.
12. Beach patrons are not permitted to feed local wildlife or entice them to stay in the area. Wildlife harassment is also strictly prohibited.
13. Measures taken to protect ones' self from the sun, such as sunblock, beach umbrellas, etc. are strongly recommended.

Continued from Page 18

feet up, running to a neighbor's culvert, and it doesn't function very well. And it was eroding, you guys came out and added some rocks. It kind of slowed it down but now the erosion is coming back. And I was told that it was on be put on the agenda for 2020 but covid started so I didn't come back to follow up and I was just curious where that was as it's coming back to be a problem. **Tony Harris** Rob do you know where that one is. **Rob Clarkson** Yes, I know exactly where it is. It was looked at when we did the entire ditching going forward. And it wasn't as much of as priority as some of the areas that are flooding. So it basically got priority 2 instead of priority 1. And if it is eroding again then we can put some more riprap around and solve that problem for a little longer, put a bandaid on it basically until we have the money to actually get to that area. **Jeremy Jasudowicz (1041)** So we talked about, you know, like I said, it's going back from 2019. I don't know if there's a way to get that bumped up a little bit, because it is eroding and then it came back. We did try a repair job but I'm sure you know, we had to pull it back because it started flooding that corner pretty bad. So we pulled out where that black sheeting was, we pulled that back because it was flooding, but kept the riprap but it's just starting to erode again. **Rob Clarkson** Black sheeting is soil cloth. **Jeremy Jasudowicz (1041)** It was backing up way too much, so we pulled that back. **Tony Harris** We can have Rob look at and see if there's something they could do with that or see if they can address it with some more rock. Generally what we try do on the ditching and on the roads is prioritize things in worst to best and start with the worst and keep working our way forward. I'm not actually familiar with that area so I can't say how it compares to the others. These guys have been out and looked at it so we'll see what we can do, maybe do little improvements to keep it going, see if it needs some more riprap or something. **Jeremy Jasudowicz (1041)** Do you have a guesstimate idea of when you might be able to put that culvert in? **Tony Harris** I have to have the plan to see where it was ranked. I don't have that with me tonight, we can certainly look into it and let you know. I don't have that information with me. **Donna Kinder (341)** I have three questions. I received my packet this week. There was no agenda. Also, I'm concerned about just having 75 limit, wondering if it could be out in the parking lot. You know, sometimes we have pretty good weather at that time. And also, another question is, there was no envelope in the package to return the ballots. And I noticed then that we have to come up here and turn them in. So will you be receiving as many ballots that way? Or why was there a change? **Tony Harris** So the agenda, I can't really answer that one. There should have been one in there. **Donna Kinder (341)** There wasn't. **Tony Harris** We can definitely get one posted on the website. As far as the parking lot, we could consider that.

Generally, what we found is, if we're not voting on something that affects the dues, we generally do good to get 40 or 50 people here. So I'm not sure that 75 will be an issue. Generally, the times we've had packed houses was when there was some proposal that was going to change the dues being paid. And then obviously its standing room only. But on the other years, when there hasn't been something that really affects a person's pocketbook or the dues it's slim. So I don't know if the 75 will really be an issue or not. The reason there was no envelope was, let's see, this is 21. **Rob Clarkson** Because you can't mail it back. **Tony Harris** Yes, you can't mail it back. In 19' we changed to add the absentee ballot, we inadvertently changed some of the language in the rule. And so now everything is covered in the same absentee ballot language. And so to do that, you have to bring a valid ID and get it verified that you're a member in good standing when you cast your ballot. And so you have to come up to the clubhouse. So we're going to have to propose some language changes that will go to the membership for the 2022 meeting, to change that back so they'll be able to mail in their ballot for Board of Directors only. **Donna Kinder (341)** It had our names on it you know, whenever you returned it, so you knew. **Tony Harris** Previously to the change, you could mail in your board of director's ballot, that was the only thing you could vote absentee, everything else you had to come to the meeting and vote. And we were trying to change it so that people could vote absentee if they were going to be out of town that weekend or busy or people that live out of town would be able to vote and send their ballots in. Well, when we did it, trying to make sure that we had only members in good standing voting, we had it so you had to present a valid ID at the office at the time you cast your ballots, so they could see it, check it and then put it in the ballot box. And so we need to really change that language. **Donna Kinder (341)** Okay, so what's going to be on the agenda? **Tony Harris** It's really just the board of director's vote and the budget? **Donna Kinder (341)** Okay. Thank you. **Rob Clarkson** I'm pretty sure that it was in the cover letter that stated that it was just those two. There was two positions being voted on for the board of directors and the budget for the year. **Tony Harris** And I should say that's the only items that'll be voted on. We'll have the other items that are on the agenda, which is, you know, thanking previous board members that are rolling off, invocation, those types of things. But the only items to be voted on are the board of directors and the budget. **Kenneathia Hagen (1991)** Back in October, I actually asked the question, what was the security plan for 2021? Because last year, it just wasn't a good plan, whatever that may have been because of the lack of security presence on the lake. I asked the same question in January and I received we're working on it. And now we're in boating season. I witnessed something over

The Pain of Sin

Does sin irritate God? Is he just a heavenly 'killjoy' who picks those things he knows we will enjoy, label them 'sin' and then demand that we not do them? Is he just out to keep us from having fun?

The answer to this question may surprise you. God hates sin because He loves us. The things he has labeled as sin are really dangerous and destructive. He doesn't want us hurt. We can understand that reality because of our relationship with our kids. I had a very young child that used to like to run into the kitchen and high-five the top of the stove which he couldn't see. If the stove was on, that was really dangerous so I demanded that he stop doing that. I didn't let my children play in traffic. I 'commanded' them to brush their teeth every day. Was I a mean parent? Not at all. I loved my children and tried to protect them from those actions or behavior that would harm them in some way.

So it is with God. From his eternal perspective, he understands what will cause us pain and grief, and as any loving father does, he defines the limits and warns us away from those things.

Sin is fun...for a season, but there is always a payday of grief. Media glorifies drinking, sex outside of marriage and the powerful, free spirited, rebellious types, but it never shows the alcoholics who have lost everything to drink, those who pick up an STD through immoral behavior nor the incredible loneliness in old age of those who live only for themselves.

God hates what hurts those he loves.
He is truly a loving and caring parent.

the weekend that was very disturbing. And I just would like to know, what is going to be changed with the security out on the lake this year? **Dan Hopkins** Security was on the lake Sunday. **Kenneathia Hagen (1991)** On Sunday, the incident happened on Friday. Yeah. So. But I was just curious as to what, what is different for 2021, then 2020 or 2019? **John Crotty** Rob or Rob, do you have any feedback on this? **Rob Clarkson** We added money to the security line. They have boat patrols quite extensively during the week. You know, they can't be out there all the time, we don't have the money for that. They have been informed that it's a nice day, nice weather, they go out until they get called off. Or their on lunch or whatever. They can't be there the whole time. **Kenneathia Hagen (1991)** I understand. So as when incidents happen. Again, I live where I get to see everything on the main lake. And I mean, just a phone call to security? I mean, is that the procedure for all? I'm not gonna do to video just because I don't have my phone always with me because we are on a lake, but I just wanted to verify what that procedure is. **Rob Clarkson** That would be the call. **Kenneathia Hagen (1991)** Okay. Thank you. **John Crotty** Anything else for open floor?

Tony Harris Makes a motion to adjourn to Executive Session

Matt Ressler Seconds

Meeting adjourned at 7:58 p.m.

Meeting Minutes submitted by Karla Suttles

Date: April 28, 2021

Board of Director Attendance: Present: Anthony Harrell, John Crotty, Tony Harris, Jerry Allen, Matt Ressler & Brian Wood

Others Present: Rob Clarkson, Rob Frey and Karla Suttles from the Holishor Office

Holishor Members Present: 3

Proceedings: Meeting called to order at 7:30pm

Pledge of Allegiance recited

Meeting Minutes – Minutes of April 14, 2021

Tony Harris - Motions to approve the minutes as amended.

Jerry Allen – Seconds

All in favor

Motion carries

Transfers of Property: We had 3 transfers of property all of which triggered initiation fees.

Old Business

Culvert-Ensign Circle

Anthony Harrell Rob met with Stutz and ordered the locates for the utilities. A 12-inch culvert was delivered to the job site. As soon as the locates are done for the utilities and completed, Madison Telco will be notified to have an observer present during excavation and work will proceed. **Rob Clarkson** I do have an update on that. The culvert was put in, the cleanup of the site has to be done with the asphalt patch. That's all that's left. **Anthony Harrell** Thank you Rob. I should state Dan Hopkins is not here tonight. As of tonight, he's officially resigned from the board of directors. So we will see what happens with the votes for the new board members and then after the election, we will appoint someone to replace Dan.

Elevator

Anthony Harrell There are no updates yet, from as far as estimates and everything for that, we are going to get some more estimates on future repairs for the elevator.

Fish Stocking

Anthony Harrell The supplier that we went through, they still have the pure stripers that they owe us. Evidently, they're having a hard time getting those. Rob is going to look into a different supplier for getting us the stripers. Anything to add to that, Rob. **Rob Clarkson** I don't have a very good feeling that is going to happen this year. Matt Ressler Can we take that money that's allocated for the stripers and put it in the flatheads and just get those in the lake and start curing the problem? **Anthony Harrell** Something we can discuss if it doesn't look like we're going to be able to get the pure stripers then we can either get more hy-

brids, or we can get more flatheads. **Matt Ressler** How much money do we have left in that budget? **Rob Clarkson** I'd have to look, it was somewhere around \$4,500 to \$5,000. **Matt Ressler** I would say my recommendation would be split it between hybrid stripers and flathead catfish. The hybrids will control the shad population and flatheads will help control the crappie population. So my recommendation would be to take the remaining money and split it between the two and continue looking for stripers for stocking of next year. **Brian Wood** Is the supply on the flatheads and the hybrids there? **Rob Clarkson** Flatheads are caught and brought here. I looked into trying to obtain fingerlings on them and three places that I called didn't have a successful year. So it was a bad year for flathead breeding. **Matt Ressler** The thing with the flatheads the reason we put them in here at that size, five to seven pounds is to start eating these crappie in the lake instead of putting the fingerlings in because it is going to take longer to balance it out. **Anthony Harrell** So I'll take a motion if that's what we want to do. **Tony Harris** So is the availability of the hybrids and the flatheads there to get the additional fish? **Rob Clarkson** I'm sure we can get the flatheads, I'll have to check on the hybrids. **John Crotty** We can word it so that money can go towards either one of those, whatever we get the most of or whatever is available. **Matt Ressler** So I would do our best of ability the money leftover allocated for the hybrid stripers and flathead catfish between the two, and if the hybrids aren't available.... then if the hybrids aren't available, because you know you're running into a problem you don't want to overstock this lake with flatheads because then you're going to have another problem on your hands. **Tony Harris** After we got regular stripers, we were going to see how much money was left to see how many of the flatheads we could buy, if I remember the conversation. So I'm not sure how much money we have, I'm just curious how much money we have left. **Rob Clarkson** I'll get a line item on it tomorrow. **Matt Ressler** I say we just split it between the two. If we're not able to get the hybrid stripers, order largemouth bass. That's another option from the hatchery. **John Crotty** Sounds like to me we need to wait to the next meeting to get some more information to know what's actually available. **Tony Harris** I would like to because if there's an issue, we could get the flatheads, but we're saying we could have too many, we need to know how much money we have to see how many we can get of these things to know what right mix is. **Rob Clarkson** You can also carry that money over too. **Brian Wood** Or we could make a motion now and agree upon splitting it in half and if we can't get the hybrids, then we table it till the next week. **John Crotty** At least spend half of it on flatheads now, get that going. If we can get hybrids get them, if we can't whatever money is left we'll figure out what to do with it.

Brian Wood Makes a motion to take the remaining money that's left over from the fish stocking and split it between hybrid stripers and flathead catfish, regardless of the availability of the hybrid stripers we'll do half of that allocation towards flathead catfish. If the hybrids are available, we'll buy the hybrids, if they're not available we will save that money and discuss it at the next meeting.

John Crotty Seconds

All in favor

Motion carries

Creel Limit

Anthony Harrell The creel limit sign has been hung at the marina that came into effect over the weekend. It was hung on Monday. So the membership knows, the new creel limits are in effect and the sign is hung at the marina.

Culvert - Acapulco And Mexico

Anthony Harrell The last meeting there was a discussion about a culvert at Acapulco and Mexico and that the culvert was eroding. Rob went out and took a look at that particular culvert. It may be hard to see for everyone, but the water flows this way, and this way, and then the culvert is actually right here, and you can see all of this debris. It's the membership's responsibility for keeping our ditches clear. So all that is clogged up before the culvert needs to be cleared out. And just to make another mention of it, homeowners are responsible for keeping their ditches clear. Any questions on that?

Restaurant

Anthony Harrell We have reached an agreement on the restaurant with the Foundry and work is being done in the restaurant now. They will announce an

opening date when they're ready.

Open Floor

Matt Ressler Rob, where are we at with updating the carpet up here? **Rob Clarkson** We haven't got any more bids, we don't have any new bids I should say. **Matt Ressler** And a stop sign update. **Rob Clarkson** We have not received all of our confirmations back from JULIE and we are trying to coordinate with Marathon Pipeline for the one on Caribbean. They have to be there when it's put in. **Matt Ressler** You have an idea when that's going to be completed? **Rob Clarkson** We're waiting on Marathon to tell us when they can be there, they have one guy that works this area.

Tony Harris Makes a motion to adjourn to Executive Session

HOLIDAY SHORES FIRE DEPARTMENT

Firefighter's Footnote

Firefighter's Footnote - Thanks to everyone for helping to make our Fish Fry/BBQ a great success. We really appreciate our community's support. Summer is officially here! Make sure you remember to wear sunscreen, hydrate and practice safe boating. The annual Yard Sale is Saturday, June 5 and

we will sell donuts, foot long hot dogs, soda and water. We will also hand out maps of the yard sale. In July, we will once again help out at the Ski Show and Fireworks display, pending covid restrictions. Over the past month we have

view and Ambulance Familiarization, and practice out Rural Engine and Tender Operations. If you're interested in what we do, stop by the station any Monday evening from 7-9pm. You can check us out on our website at www.hsfed.org or follow us on Facebook. Thanks again for your support.

practiced our pump operations, building construction/evolutions and fire flows. Next month we have been permitted to do a live burn of a building where we will put our skills to use. We will also have our Protocol Re-

AMERICAN FLAG CAKE

For the flag cake:

1/2 cup unsalted butter softened to room temperature (1 stick)
1 cup granulated sugar
1/2 cup honey
2 large eggs at room temperature
2 teaspoons vanilla extract
3/4 cup nonfat plain Greek yogurt at room temperature

1 1/4 cups white whole wheat flour*

1 cup all-purpose flour
1 teaspoon baking soda
1/2 teaspoon kosher salt
3/4 cup milk plus 2 tablespoons

For the frosting and decoration:

12 ounces reduced-fat cream cheese Neufchatel, at room temperature

6 tablespoons unsalted butter at room temperature

1 1/3 cups powdered sugar
1/4 cup nonfat plain Greek yogurt at room temperature
1 teaspoon pure vanilla extract
1 cup fresh blueberries
2-3 cups sliced fresh strawberries

Preheat the oven to 325 degrees F. Generously grease and lightly flour an 11x17-inch half-sheet pan or coat with baking spray (the floured kind, like this). Set aside. In the bowl of a stand mixer fitted with the paddle attachment or a large bowl with a hand mixer or spoon, cream the butter for 1 minute on medium speed, until it is smooth and creamy. Add the sugar on medium speed and beat until fluffy and light in color. Beat in the honey, then the eggs and vanilla until smooth and nicely combined, stopping to scrape down the sides and bottom of the bowl a few times. The mixture may look curdled. Beat in the yogurt on medium-high speed until blended. In a large bowl, whisk together the whole wheat flour, all-purpose flour, baking soda, and salt. Pour one-third of the flour mixture into the butter mixture. Beat on low speed for 5 seconds, then pour in half of the milk. Beat on low speed for 5 seconds. Repeat with the next third of the flour, then the remaining half of the milk. Add the last third of the flour and beat just until combined and the batter is smooth. Do not overmix. Spread the cake batter into the prepared pan, smoothing it into a thin, even layer with a rubber spatula or offset spatula. Bake for 18 to 22 minutes or until the top is lightly browned and a toothpick inserted in the center comes out clean, rotating the pan 180 degrees once halfway through. Place the baked cake on a wire rack and let cool in the pan completely. Meanwhile, make the frosting.

For the frosting: In the bowl of a stand mixer fitted with the paddle attachment or a large bowl with a hand mixer or spoon, beat the cream cheese, butter, powdered sugar, yogurt, and vanilla on medium speed until smooth and combined. Spread the frosting over the cooled cake. Arrange blueberries in rows in top left corner to form the "star" portion of the flag. Line the strawberry slices in 5 rows to form the "stripes." Refrigerate until ready to serve.

Notes *You can substitute the same amount of all-purpose flour for the 1 1/4 cups white whole wheat flour. If you make this swap, reduce the amount of milk in the recipe to 3/4 cup plus 1 tablespoon. Cake can be made 1 day in advance, covered tightly at room temperature, and then frosted before serving. Frosting can also be made 1 day ahead of time and stored in an airtight container in the refrigerator. Let come to room temperature for easier frosting of the cake. Store leftovers in the refrigerator, tightly covered, for up to 3 days. You can also remove the fruit and store for up to 5 days in the refrigerator or freeze for up to 3 months.

BOATING SAFETY

Legal Compliance – “All watercraft operated on Holishor Association Lakes must adhere to and comply with state and federal laws as stated in the Illinois Registration and Safety Act.”

Speed Limit – “The maximum speed of any watercraft operated on Holiday Lake shall be 55mph or as defined in the Reckless or Careless Operation section of the Holiday Shores Boating Rules. Operation of said watercraft shall be in a manner that does not create an exaggerated wake. Intentionally ‘plowing’ or ‘pushing water’ at speeds greater than no-wake, but less than those typically maintained while ‘on plane’ is not permitted.”

Watercraft/Registration – “All watercraft being operated on Holiday and Su Twan Lakes must have a current state registration decal and numbers, one/current Holiday Shores decal, and lot numbers affixed.”

Operating Age – The minimum age to operate watercraft on Holiday Lake is 12, providing the individual has passed a state certified boater safety class. Individuals between the ages of 12 and 18 must possess a valid boater safety card to operate watercraft, unless under the direct supervision of a member or a person over the age of 18, who has member consent.

Watercraft Limit – No member shall have more than three motorized watercraft registered to the same membership in operation at one time.

Size Limit – All watercraft being operated on Holiday Lake except pontoon boats with tubular bottoms, are limited to 22 feet in length. Pontoons are restricted to 28 feet.

Traffic Pattern – All watercraft being operated on Holiday Lake must follow a counterclockwise direction of travel, similar to that of operating a motor vehicle on the roadway.

Boating Hours – Boating on Holiday and Su Twan Lakes is permitted 24 hours a day, but watercraft are restricted to No-Wake speeds from sunset to sunrise.

Noise Level Limit – No watercraft may be operated on Holiday or Su Twan Lakes in a manner that exceeds a noise level of 75 decibels. This restriction includes inboard/outboard motors, stereos, etc.

Restricted Areas – No watercraft shall be operated in any manner except prescribed for areas marked No-Wake, Swimming Area, etc. Holiday Lake is considered No-Wake when the lake reaches 9” above full pool and 16” below full pool.

Reckless or Careless Operation – Careless: No watercraft shall be operated in a manner that puts any person or property in danger or at a rate of speed that prohibits the driver from stopping the craft within a safe distance. Reckless: No watercraft shall be operated in a manner that willfully and wantonly puts life, limb, or property of another person in danger. This restriction applies to actions such as weaving through traffic, jumping wake when visibility is obstructed, following too close to skiers, playing ‘chicken’, or passing another craft in a manner that produces a hazardous wake/wash. This restriction also applies to the misuse of water skis, wake boards, or other devices.

Water Skiing – Water skiers, wake boarders, tubers, etc. may not be towed without at least two competent persons in the tow boat, to observe the individual(s) being towed and provide assistance if distressed/injured.

Distance – Operators must keep a safe and reasonable distance between their craft and other lake users, such as swimmers, downed skiers, fishermen, etc. They must also maintain a distance of 75ft from shore when making a wake. Seventy-five-foot markers have been replaced with new, larger white/blue buoys.

Orange Flag – Operators are required to display a bright orange flag on their vessel **any time they have a skier, tuber, wake boarder, etc. in the water.** The flag must be a 12 inch by 12 inch square and affixed to the highest point of the craft, such as a ski tower or pontoon top.

Racing – Racing of any watercraft on Holiday or Su Twan Lakes is prohibited.

Power Turns – Power Turns (also referred to as 180s or 360s) are permitted as long as the following criteria are met: 1.) Craft is not unreasonably close to another craft, causing it to swerve or take evasive action to avoid a collision. 2.) Not done in a manner that causes the driver and/or passengers to be thrown from the craft. 3.) Not done in a cove or in a manner which causes a nuisance to another member.

Engine Cut-Off – All watercraft (prop-driven and PWC’s) equipped with an engine cut-off device may not be operated unless the device is properly functioning and it’s lanyard is securely attached to the driver.
