

A vibrant tropical-themed border surrounds the central text. It features several slices of watermelon with red flesh, black seeds, and green rinds. Interspersed with the watermelon are various green leaves, including large monstera leaves with characteristic holes and long, feathery palm fronds. The background within the border is a mix of light blue and light green washes.

BOATING SAFETY

Legal Compliance – “All watercraft operated on Holiday Association Lakes must adhere to and comply with state and federal laws as stated in the Illinois Registration and Safety Act.”

Speed Limit – “The maximum speed of any watercraft operated on Holiday Lake shall be 55mph or as defined in the Reckless or Careless Operation section of the Holiday Shores Boating Rules. Operation of said watercraft shall be in a manner that does not create an exaggerated wake. Intentionally ‘plowing’ or ‘pushing water’ at speeds greater than no-wake, but less than those typically maintained while ‘on plane’ is not permitted.”

Watercraft/Registration – “All watercraft being operated on Holiday and Su Twan Lakes must have a current state registration decal and numbers, **one/current Holiday Shores decal**, and lot numbers affixed.”

Operating Age – The minimum age to operate watercraft on Holiday Lake is 12, providing the individual has passed a state certified boater safety class. Individuals between the ages of 12 and 18 must possess a valid boater safety card to operate watercraft, unless under the direct supervision of a member or a person over the age of 18, who has member consent.

Watercraft Limit – No member shall have more than three motorized watercraft registered to the same membership in operation at one time.

Size Limit – All watercraft being operated on Holiday Lake except pontoon boats with tubular bottoms, are limited to 22 feet in length. Pontoons are restricted to 28 feet.

Traffic Pattern – All watercraft being operated on Holiday Lake must follow a counterclockwise direction of travel, similar to that of operating a motor vehicle on the roadway.

Boating Hours – Boating on Holiday and Su Twan Lakes is permitted 24 hours a day, but watercraft are restricted to No-Wake speeds from sunset to sunrise.

Noise Level Limit – No watercraft may be operated on Holiday or Su Twan Lakes in a manner that exceeds a noise level of 75 decibels. This restriction includes inboard/outboard motors, stereos, etc.

Restricted Areas – No watercraft shall be operated in any manner except prescribed for areas marked No-Wake, Swimming Area, etc. Holiday Lake is considered No-Wake when the lake reaches 9” above full pool and 16” below full pool.

Reckless or Careless Operation – **Careless**: No watercraft shall be operated in a manner that puts any person or property in danger or at a rate of speed that prohibits the driver from stopping the craft within a safe distance. **Reckless**: No watercraft shall be operated in a manner that willfully and wantonly puts life, limb, or property of another person in danger. This restriction applies to actions such as weaving through traffic, jumping wake when visibility is obstructed, following too close to skiers, playing ‘chicken’, or passing another craft in a manner that produces a hazardous wake/wash. This restriction also applies to the misuse of water skis, wake boards, or other devices.

Water Skiing – Water skiers, wake boarders, tubers, etc. may not be towed without at least two competent persons in the tow boat, to observe the individual(s) being towed and provide assistance if distressed/injured.

Distance – Operators must keep a safe and reasonable distance between their craft and other lake users, such as swimmers, downed skiers, fishermen, etc. They must also maintain a distance of 75ft from shore when making a wake. Seventy-five-foot markers have been replaced with new, larger white/blue buoys.

Orange Flag – Operators are required to display a bright orange flag on their vessel **any time they have a skier, tuber, wake boarder, etc. in the water**. The flag must be a 12 inch by 12 inch square and affixed to the highest point of the craft, such as a ski tower or pontoon top.

Racing – Racing of any watercraft on Holiday or Su Twan Lakes is prohibited.

Power Turns – Power Turns (also referred to as 180s or 360s) are permitted as long as the following criteria are met: 1.) Craft is not unreasonably close to another craft, causing it to swerve or take evasive action to avoid a collision. 2.) Not done in a manner that causes the driver and/or passengers to be thrown from the craft. 3.) Not done in a cove or in a manner which causes a nuisance to another member.

Engine Cut-Off – All watercraft (prop-driven and PWC’s) equipped with an engine cut-off device may not be operated unless the device is properly functioning and it’s lanyard is securely attached to the driver.

SPECIAL MEETING

JULY 18, 2020 @ 10AM

DUE TO THE COVID19 PANDEMIC, THIS MEETING IS TO COVER THE REMAINDER OF THE
BALLOT ITEMS POSTPONED FROM THE ANNUAL MEETING.

- VENTILATION (INBOARD ENGINE)
- SOUND PRODUCING DEVICES (HORN AND/OR WHISTLE)
- FLAME ARRESTOR (INBOARD)
- NAVIGATION LIGHTS
- OIL POLLUTION PLACARD
- BILGE

MEMBERS, HOLIDAY SHORES BOAT DECALS FOR THE CURRENT YEAR MUST BE PRESENTED ON YOUR BOAT, ALWAYS!

THIS IS A GENERALIZED LIST FROM WWW.DNR.ILLINOIS.GOV. PLEASE REFER TO THIS WEBSITE FOR MORE INFORMATION, BOAT REGISTRATION AND RENEWAL AND ILLINOIS BOATING COURSES.

Manager's Report *by Rob Clarkson*

The Lake remains at full pool and our water quality is excellent. We will be heading into the official kick off of the boating season with a lake that is at full pool. I would like to remind everyone that boat stickers expired April 30th so be sure to get this year's sticker and avoid any unwanted correspondence from my staff. No Wake areas are marked by buoys either at the 75' mark from the banks on Main Lake, at the entrance to No Wake coves, or at the designated No Wake sections of coves. Please be respectful of this rule while boating so all can enjoy their time on the lake.

The COVID-19 pandemic has changed the way we all do business. We are hopeful that this will end soon, and life can get back to somewhat a normalcy. Our beaches could remain closed if the Executive order is extended again. Those who choose to ignore the Governors Executive order and use the beaches, do not follow social distancing, or the boating guidelines could be reprimanded by the Illinois Dept of Public Health while bringing attention to private Lake communities.

The ditching project in the Southeast quadrant is nearing completion and soon after road repairs will begin. Please remain patient and keep from parking along roadside when workers are present. Maintenance will be hard at work repairing roadways this summer. We will be Oiling approximately 5 miles of roads again this year. Attention to trouble pot holes and road edge rebuilding for drainage will be our main focus. Yard waste and debris left in the ditches impedes draining and can block culverts down stream which can affect a great number of people. Be a courteous neighbor and make sure you aren't creating a problem on either side of your property.

2020 is a draw down year. We will begin to lower the lake on September 20th and it will naturally refill beginning Dec 10th. Make sure to have your Seawall or Dock plans submitted and permits in place.

REMINDER

2020 Dues & Assessments are due
January 1st.

They can be paid in increments of:

\$236.00 January 1st

\$237.00 March 1st

\$237.00 May 1st

Late charges are assessed on the 10th of each month.

BOAT DECALS

2020 boating decals are yellow. If you can not wait to be the first on the lake with your 2020 boating decal, bring in to the office a copy of your registration and proof of \$300,000 liability insurance as soon as your Dues & Assessments are paid in full. There will be three types of decals, motorized, non-motorized and PWC.

Holiday Shores Garden CLUB NEWS

Covid-19 has certainly changed our lives! Here we are at the beginning of June, and Garden Club hasn't had a meeting yet this year. And, regrettably, we had to cancel our Annual Plant Sale, which was not only a big disappointment for the whole community who supports our club, but, also, for all our members. We were able to still follow through with our geranium orders and are pleased with the support we received. More details about the geranium sales will be provided in the July issue.

The **Annual Holiday Shores Garden Tour is scheduled on Monday, June 15, 6:00pm.** We will tour the gardens and yards of four residents. Please plan to meet on the clubhouse parking lot in time to depart promptly at 6:00pm via carpool. Visitors are welcome and encouraged to attend. Following the tour, we will return to the clubhouse for refreshments and our business meeting. *Please note that our plans will be adjusted as necessary based upon the pandemic restrictions and guidelines that are in place at the timing of the tour. It's likely that masks will be required, and that social distancing will be expected. All information will be posted on the Garden Club web page - <http://www.holidayshores.us/garden-club>.*

The **Native Plant Community Garden workday is scheduled on Saturday, June 20, 8:00-9:00am.** Community volunteers are needed to help maintain this garden. It's located at the north end of the lake on Biscay Drive. Again, all information related to any adjustments that may be required will be posted on the web site link noted above.

The photos on this page reflect the beautiful colorful flowers that are blooming throughout our community!!!

June Garden Tip: Annuals need regular fertilizing for good bloom production, about every 4 weeks. Foliage from your spring blooming bulbs should be ready now to cut back to the ground. Leaves should be yellow white and withered.

Find us on Facebook and Instagram!

ASK WALTER THE WATER BOTTLE

Q: WHAT IS HONEST WATER?

Honest Water is purified water. It can be found in our 5- and 3-gallon water bottles, which are delivered right to your door! Our company uses Reverse Osmosis to purify the water on a large scale. We also install in-home systems produced by Kinetico Water Systems so you can have your tap water purified on the spot!

Q: WHY SHOULD I BE USING PURIFIED HONEST WATER AND KINETICO WATER SYSTEMS INSTEAD OF TAP WATER?

In regards to drinking water, Honest Water is devoid of any contaminants you might find in regular tap water which makes it taste better and is healthier for you! (Ask us about the Tea Test!!!)

In terms of your home's health, our Kinetico water systems help keep your appliances new, your laundry fresh, your glasses bright and your hair and skin baby soft.

Q: HOW DO I GET MY HANDS ON HONEST WATER

For bottle service, call, message or email us! We'll get your set up in no time! For Kinetico systems, we'd be glad to set up your free water analysis! This test measures water hardness and TDS (Total Dissolved Solids).

Q: ANYTHING ELSE I NEED TO KNOW?

Honest Water is a community first, no contracts company! We believe in the power in a (socially distant) handshake! Our mission is to get delicious, purified Honest Water to as many people as possible.

1. Brian Wood
2. Jerry Allen
3. John Crotty
4. Simeon Thomas
5. Dan Hopkins

Dave Decker – These names will go on the ballot and proxy. The copy of the document we have is in black and white. My recommendation would be the line underneath where it says the ballot must be signed and dated should be in red. I also recommend that the points underneath where the member is to fill them in, I would print those in red also. So printed name of lot owner, date of signing and signature of the lot owner all in red. Does anyone have any objections to that?

Tony Harris – No, I think that sounds good.

Dave Decker – I would like to put a letter in the Annual Meeting packet that describes what we are doing with the Annual Meeting requesting folks not to show up. Their vote will be counted by signing their ballot. We have planned a special meeting on July 18 covering the three agenda items, including the 2021 budget, shoreline erosion and the fine change. Does anyone have any objection?

Ali DeVries – No, I think we should definitely do that.

Anthony Harrell – Motions to approve the Board of Directors ballot and proxy with the order of the names listed as drawn tonight.

Shaun Diltz – Seconds.

All in Favor.

Motion Carries.

Ditching Project Update

Rob Clarkson – We found a gas main that is at the same elevation that the pipe is, so it is going to involve a little extra ditching in order to lower it and daylight it. I believe it came out to \$300 to do so. I just wanted to make you aware of this change.

Shaun Diltz – Did you cause any damage?

Rob Clarkson – No, we would have hit it, but it was found when we went to install the pipe. The gas main is right in the middle of the elevation. You cannot raise it, so it has to be lowered.

Steve Yates – Motions to adjourn the meeting.

Tony Harris – Seconds.

All in Favor.

Meeting adjourned at 7:40 PM

Meeting Minutes submitted by Megan Jackson

Date: April 13, 2020

Attendance

Present: Ali DeVries, David Decker, Tony Harris, Steve Yates, Shaun Diltz, and Matt Ressler

Excused Absence: Anthony Harrell

Others Present

Rob Clarkson

Proceedings

Meeting called to order at 7:05 PM

Pledge of Allegiance recited

Old Business

The board briefly discussed the revised ballot for the board of director voting and the proxy which need to be separate documents. All had reviewed a copy they had previously received.

Steve Yates motioned to approved the revised ballot as submitted

with Ali DeVries seconding the motion.

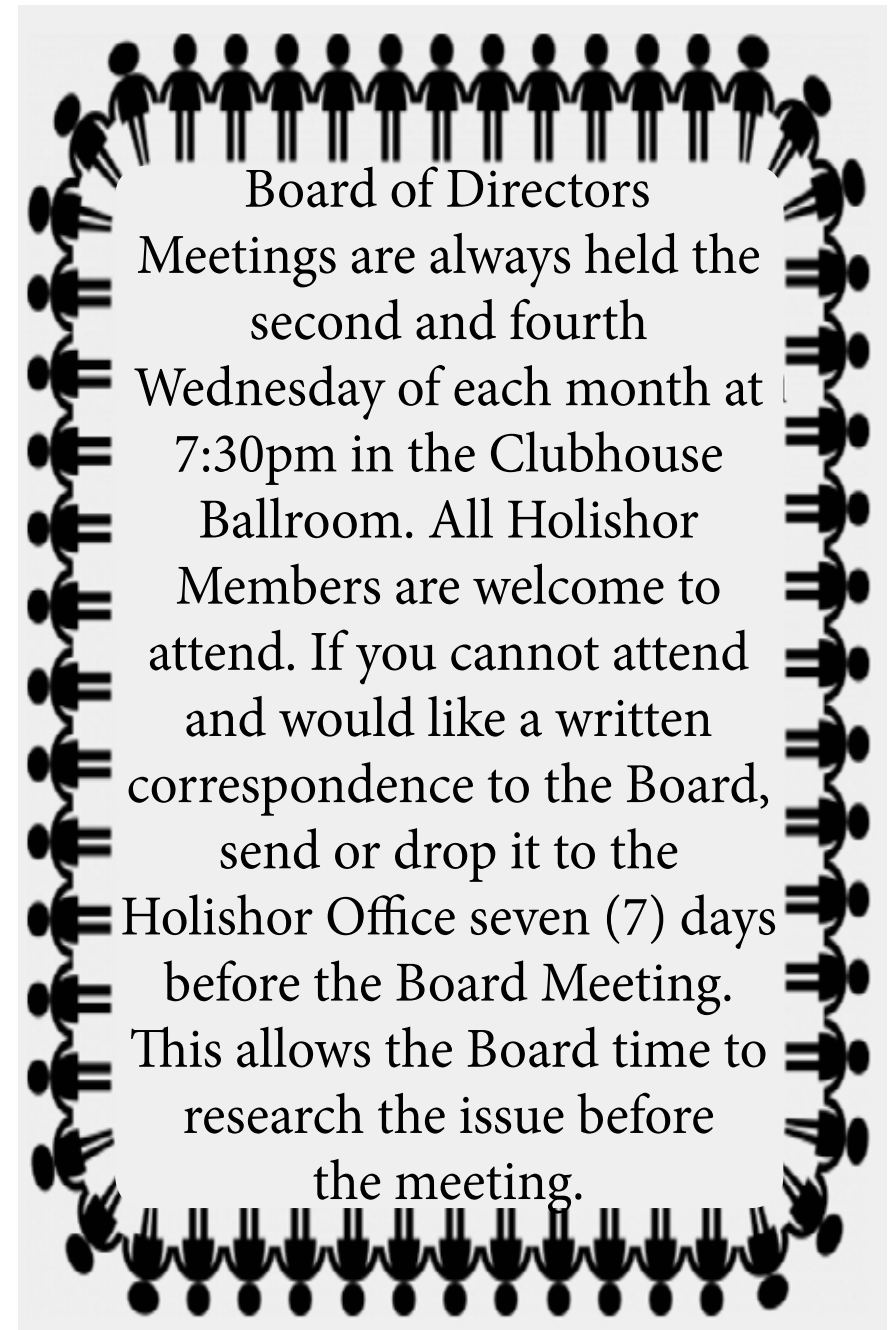

All in Favor, motion carried.

Steve Yates motioned to adjourn the meeting, with Ali DeVries seconding the motion.

All in Favor, motion carried.

Meeting Adjourned at 7:12 PM

Meeting Minutes submitted by David Decker

Firefighter's Footnote & Medic Minute

Firefighter's Footnote -

We hope everyone has been staying safe and healthy over the past couple of months. While at the station, we at HSFD, have been observing the guidelines of social distancing, wearing masks as needed, and hand washing or using hand sanitizers. We have regularly cleaned the station and our equipment.

Whenever we respond to a call, we wear the appropriate PPE (personal protective equipment) according to each situation. To maintain our training, we attended a remote class on Fire Flows and Building Construction. We also reviewed Pump Operations and renewed our CPR/AED certifications while maintaining our distance and safety protocols. We will hold our Water Rescue drill this coming month. As businesses start to open and more people gather outside please remember to continue social distancing, wearing masks when around others, and to practice proper handwashing/sanitizing. Navigating these times and finding a new normal will not be easy but we can get through this together.

Medic Minute -

It seems we are learning almost daily about how COVID-19 can affect us once we are infected. The virus attaches itself to receptors that are throughout the body and can cause an exaggerated immune response, so there can be system-wide problems. Since it attacks the whole body, there can be many symptoms including: fever, cough, fatigue, difficulty breathing, headache, body aches, loss of taste or smell, pinkeye, diarrhea/vomiting, rash, seizures, stroke or heart attack symptoms, heart-rhythm disorders, blood clots, dizziness, confusion, memory loss, and pain in fingers or toes with discoloration.

It is unknown if the virus itself or the body's hyper immune response is the cause for those who become seriously ill, both young and old alike. The good news is that the medical community is learning what signs and symptoms to watch for and what possible treatments can help those affected. There is also more testing and PPE becoming available. Continuous research is being done to find a vaccine to combat the virus. Until then, we must continue to practice safety precautions of social distancing within small groups, wearing a mask while in public, proper handwashing or using hand sanitizers, and going out only when necessary.

CLIMATE CHANGE & EXTREME HEAT

Extreme heat events, or heat waves, are a leading cause of EXTREME WEATHER-RELATED DEATHS in the United States and the number of heat-related deaths is rising!

WHO'S AT RISK?

Adults over 65, children under 4, people with existing medical problems such as heart disease, and people without access to air conditioning

WHAT CAN YOU DO?

STAY COOL

- Find an air-conditioned shelter
- Avoid direct sunlight
- Wear lightweight, light-colored clothing
- Take cool showers or baths
- Do not rely on a fan as your primary cooling device

STAY HYDRATED

- Drink more water than usual
- Don't wait until you're thirsty to drink more fluids
- Avoid alcohol or liquids containing high amounts of sugar
- Remind others to drink enough water

STAY INFORMED

- Check local news for extreme heat alerts and safety tips
- Learn the symptoms of heat illness

LEARN MORE!

Visit CDC's Environmental Public Health Tracking Network to learn more about climate change and extreme heat at www.cdc.gov/ephtracking

This is a friendly reminder that lot numbers and Holishor boat decals need to be present on ALL watercraft.

That also includes all non-motorized watercraft (kayaks, canoes, paddleboards and paddleboats).

Do you need Holishor boat decals? Contact the office and we will supply them for you. Just make sure you have your watercraft registration and proof of insurance showing \$300,000 liability handy!

PLEASE READ THE IMPORTANT INFORMATION BELOW REGARDING PERSONAL FLOTATION DEVICES. IT IS IMPARITVE THAT THE APPROPRAITE PFD IS KEPT ON EACH WATERCRAFT WHILE BOATING ON HOLIDAY LAKE AND SU TWAN LAKE. THIS INFORMATION CAN BE FOUND ON PAGES 9 AND 10 IN YOUR HOLIDAY SHORES BOATING RULES.

Personal Flotation Devices from 625 ILCS 45/4 1 No person may operate a watercraft unless at least one U.S. Coast Guard approved PFD of the following types or their equivalent is on board for each person: Type I, Type II or Type III. No person may operate a personal watercraft or specialty prop craft unless each person aboard is wearing a Type I, Type II, Type III or Type V PFD approved by the United States Coast Guard. No person may operate a watercraft 16 feet or more in length, except a canoe or kayak, unless at least one Type IV U.S. Coast Guard approved PFD or its equivalent is on board in addition to the PFD's required in paragraph A of this Section. A U.S. Coast Guard approved Type V personal flotation device may be carried in lieu of the Type I, II, III or IV personal flotation device required in this Section, if the Type V personal flotation device is approved for the activity in which it is being used. When assisting a person on water skis, aquaplane or similar device, there must be one U.S. Coast Guard approved PFD on board the watercraft for each person being assisted or towed or worn by the person being assisted or towed. No person may operate a watercraft unless each device required by this Section is: Readily accessible; in serviceable condition; of the appropriate size for the person for whom it is intended; and legibly marked with the U.S. Coast Guard approval number. Approved personal flotation devices are defined as follows:

- Type I A Type I personal flotation device is an approved device designed to turn an unconscious person in the water from a face downward position to a vertical or slightly backward position and to have more than 20 pounds of buoyancy.
- Type II A Type II personal flotation device is an approved device designed to turn an unconscious person in the water from a face downward position to a vertical or slightly backward position and to have at least 15 1/2 pounds of buoyancy.
- Type III A Type III personal flotation device is an approved device designed to keep a conscious person in a vertical or slightly backward position and to have at least 15 1/2 pounds of buoyancy.
- Type IV A Type IV personal flotation device is an approved device designed to be thrown to a person in the water and not worn. It is designed to have at least 16 1/2 pounds of buoyancy.
- Type V A Type V personal flotation device is an approved device for restricted use and is acceptable only when used in the activity for which it is approved.

No person may operate a watercraft under 26 feet in length unless a Type I, Type II, Type III, or Type V personal flotation device is being properly worn by each person under the age of 13 on board the watercraft at all times in which the watercraft is underway; however, this requirement shall not apply to persons who are below decks or in totally enclosed cabin spaces. The provisions of this subsection I shall not apply to a person operating a watercraft on private property.

Further, no person may operate a watercraft on Holiday or Su Twan lakes unless a Type I, Type II, Type III, or Type V personal flotation device is being properly worn by each person under the age of 13 on board the watercraft at all times in which the watercraft is underway.

Empty Treasures

The Bible helps us think from the big picture. Outside the box. The wiser perspective. The eternity point of view. True Reality. In 2020, we have seen one of the Bible's admonitions play out right before our eyes.

Enter COVID-19. Sudden loss. The Dow hit its all-time high on Feb 12 of 29,551 but fell to 19,173 in less than six weeks. A staggering financial loss. Businesses closed. Jobs lost.

Jesus cautions us in Matt. 6:19. "Do not store up for yourselves treasures on earth, where moth and rust destroy, and where thieves break in and steal." To two brothers who were fighting over their father's estate, he said, "a man's life does not consist in the abundance of his possessions." (Luke 12:15)

Paul, the Apostle, supplies young preacher Timothy with a sermon to be preached in 1 Tim 6:17, "Command those who are rich in this present world not to be arrogant nor to put their hope in wealth, which is so uncertain..."

Wise King Solomon recognized a frustrating fact of life in Eccl 5:15. Naked a man comes from his mother's womb, and as he comes, so he departs."

One of the infuriating aspects of life in this world is that wealth is so uncertain. We may work diligently to gain only to lose. We may enjoy some of wealth's fruits, but it brings us a lot of worry and insecurity. At the end we leave it all behind.

Here is what Jesus advised. (Matt 6:20) "...store up for yourselves treasures in heaven, where moth and rust do not destroy, and where thieves do not break in and steal. Paul says, Rather than putting our hope in this world's wealth, we should "put their hope in God,... [to] lay up treasure for themselves as a firm foundation for the coming age..."

Maybe through all this loss and turmoil, God is doing us a favor. One man who was very rich and rejected Jesus' message caused Jesus to observe, "How hard it is for the rich to enter the kingdom of God! Indeed, it is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of God." (Luke 18:23-25) And yes, that is a full sized camel and a regular sewing needle. It's really difficult for wealthy people to turn from their wealth god and be saved.

To talk about this or other Bible matters, call Pastor Rob Lemon at 618.377.7729.

BEACH AND SWIM SAFETY

Holiday Shores Regulations

1. Beaches located within the Association are restricted to members and guests only.
2. Glass bottles, fires, pets and food are prohibited from the beach area.
3. Persons under the age of 16 are allowed swim: if being escorted by an individual 17 years of age or older or there is a lifeguard on duty.
4. During each shift, a lifeguard is allowed a ten-minute break every hour, during that time, swimmers under 17 years of age must exit the water, if not with an adult.
5. Holishor Association Inc. is not responsible for one's personal items, nor any personal injury sustained while using Association facilities. (water, beach, grounds, etc.)

IL Dept. of Public Health Regulations

1. Beach water is not intended, nor fit, for human consumption. Do not swallow beach water.
2. Beach admittance may be denied to individuals having:
 - Contagious diseases
 - Infections (foot infections, ear infections, vomiting, diarrhea, inflamed eyes, unhealed abrasions or lacerations, skin lesions, or bandages of any kind.
3. Persons under the influence of alcohol or behaving erratically will be denied access/removed from the beach.
4. No food, drink, gum or tobacco products are permitted in the swim area.
5. The use of glass containers is strictly prohibited.
6. Children who are not toilet trained must wear tight fitting plasticized/rubber swim pants.
7. Swimming alone is discouraged.
8. Diving in shallow water is prohibited.
9. Personal conduct that endangers the safety of ones' self, or other beach patrons, is strictly prohibited.
10. Swimming is permitted between sunrise and sunset, except during the times of thunder and/or lightening. Swimmers are required to exit the water during these conditions and remain out for a minimum of 30 minutes following the last detection of thunder or lightning.
11. Pets are prohibited from the beach area.
12. Beach patrons are not permitted to feed local wildlife or entice them to stay in the area. Wildlife harassment is also strictly prohibited.
13. Measures taken to protect ones' self from the sun, such as sunblock, beach umbrellas, etc. are strongly recommended.

Summer Safety Tips for Pet Parents

Hope you are having a nice summer! With the hot weather setting in, we wanted to remind folks that amidst the fun and games, pet health should be kept top of mind to help ensure a safe season for all. To keep dogs and cats out of harm's way, the ASPCA has created a helpful infographic with the Top 5 Summer Dangers for Pets, including:

1 Fireworks & Thunderstorms

Loud noises like fireworks are one of the top reasons pets go missing, so secure your pet in an escape-proof place. If your pet does go missing, download the ASPCA app for a free step-by-step digital toolkit to help find your pet: www.ASPCAapp.org.

2 Sun & Heat

High summer temperatures and bright days can mean dehydration, overheating, and scorched paws. Know the signs of overheating (excessive panting, increased heart rate, and weakness) and bring your pup indoors or to a cool, shady place.

3 Toxic Chemicals

Insecticides, citronella products, and glow sticks are toxic to pets. Keep your pet away from areas where chemicals have been sprayed and ensure dangerous products are out of reach.

4 Parties & Barbecues

If your pet's joining the party, make sure guests don't feed your pet human food (especially grapes, onions, avocado, and chocolate) and ensure alcoholic drinks are kept out of your pet's reach

5 Hot Cars

Even with the windows open an inch, a car's temperature can reach over 100° in 10 minutes on an 85° day. One quick errand can turn dangerous in minutes, so leave your pet safely at home. Sign our Hot Car Pledge to help save lives this summer and all year long.

GARDEN CLUB NATIVE PLANT COMMUNITY GARDEN

North End of Lake - Biscay Drive

Garden Club continues to seek community volunteers to assist with the Native Plant Community Garden. We need you to sign up to work with us and others at this garden to beautify the north end of the lake. Do you want to see more butterflies, songbirds and pollinators?

Do you wish your vegetable garden was producing a better yield? The H.S Garden Club has one answer... more Native Plants!!! With a better food supply and beneficial insects, the birds will come and our flowers and vegetables will be pollinated.

Our work days are the third Saturday of April -Oct 8-9am

A time commitment of just one hour per month will make a huge impact. Please consider adding your name to our list of volunteers for this project.

Consumer Confidence Report

Annual Drinking Water Quality Report

HOLIDAY SHORES SD

IL1195110

Annual Water Quality Report for the period of January 1 to December 31, 2019

This report is intended to provide you with important information about your drinking water and the efforts made by the water system to provide safe drinking water.

The source of drinking water used by
HOLIDAY SHORES SD is Surface Water

For more information regarding this report contact:

Name Kenneth A. Dullea, Director

Phone (618) 656-4933

Este informe contiene información muy importante sobre el agua que usted bebe. Tradúzcalo o hable con alguien que lo entienda bien.

Source of Drinking Water
The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.
Contaminants that may be present in source water include:
- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. EPA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population.

Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Source Water Assessment

We want our valued customers to be informed about their water quality. If you would like to learn more, please feel welcome to attend any of our regularly scheduled meetings. The source water assessment for our supply has been completed by the Illinois EPA. If you would like a copy of this information, please stop by City Hall or call our water operator at (618) 656-4933. To view a summary version of the completed Source Water Assessments, including: Importance of Source Water; Susceptibility to Contamination Determination; and documentation/recommendation of Source Water Protection Efforts, you may access the Illinois EPA website at <http://www.epa.state.il.us/cgi-bin/wp/swap-fact-sheets.pl>.

Source of Water: HOLIDAY SHORES SD Illinois EPA considers all surface water sources of community water supply to be susceptible to potential pollution problems; hence, the reason for mandatory treatment for all surface water supplies in Illinois. Mandatory treatment includes coagulation, sedimentation, filtration, and disinfection. Primary sources of pollution in Illinois lakes can include agricultural runoff, land disposal (septic systems) and shoreline erosion.

2019 Regulated Contaminants Detected

Lead and Copper

Definitions:

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.

Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	2019	1.3	1.3	0.082	0	ppm	N	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead	2019	0	15	5.4	0	ppb	N	Corrosion of household plumbing systems; Erosion of natural deposits.

Water Quality Test Results

Definitions:

The following tables contain scientific terms and measures, some of which may require explanation.

Avg:

Regulatory compliance with some MCLs are based on running annual average of monthly samples.

Level 1 Assessment:

A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

Level 2 Assessment:

A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

Maximum Contaminant Level or MCL:

The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal or MCLG:

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Water Quality Test Results

Maximum residual disinfectant level or MRDL:	The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
Maximum residual disinfectant level goal or MRDLG:	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
na:	not applicable.
mrem:	millirems per year (a measure of radiation absorbed by the body)
ppb:	micrograms per liter or parts per billion – or one ounce in 7,350,000 gallons of water.
ppm:	milligrams per liter or parts per million – or one ounce in 7,350 gallons of water.
Treatment Technique or TT:	A required process intended to reduce the level of a contaminant in drinking water.

Regulated Contaminants

Disinfectants and Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Chlorine	2019	0.6	0.5 – 0.6	MRDLG = 4	MRDL = 4	ppm	N	Water additive used to control microbes.
Haloacetic Acids (HAA5)	2019	39	11.3 – 59.6	No goal for the total	60	ppb	N	By-product of drinking water disinfection.
Total Trihalomethanes (TTHM)	2019	82	23.4 – 114	No goal for the total	80	ppb	Y	By-product of drinking water disinfection.
Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Arsenic	2019	2	2 – 2	0	10	ppb	N	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.
Barium	2019	0.026	0.026 – 0.026	2	2	ppm	N	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.
Fluoride	2019	0.6	0.631 – 0.631	4	4.0	ppm	N	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Manganese	2019	3	2.8 – 2.8	150	150	ppb	N	This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.

Regulated Contaminants

Nitrate [measured as Nitrogen]	2019	0.21	0.21 – 0.21	10	10	ppm	N	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.
Sodium	2019	10	10 – 10			ppm	N	Erosion from naturally occurring deposits. Used in water softener regeneration.
Radioactive Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Combined Radium 226/228	07/21/2014	0.491	0.491 – 0.491	0	5	pCi/L	N	Erosion of natural deposits.
Gross alpha excluding radon and uranium	07/21/2014	1.75	1.75 – 1.75	0	15	pCi/L	N	Erosion of natural deposits.

Turbidity

	Limit (Treatment Technique)	Level Detected	Violation	Likely Source of Contamination
Highest single measurement	1 NTU	0.039 NTU	N	Soil runoff.
Lowest monthly % meeting limit	0.3 NTU	100%	N	Soil runoff.

Information Statement: Turbidity is a measurement of the cloudiness of the water caused by suspended particles. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration system and disinfectants.

Total Organic Carbon

The percentage of Total Organic Carbon (TOC) removal was measured each month and the system met all TOC removal requirements set, unless a TOC violation is noted in the violations section.

Violations Table

Public Notification Rule			
The Public Notification Rule helps to ensure that consumers will always know if there is a problem with their drinking water. These notices immediately alert consumers if there is a serious problem with their drinking water (e.g., a boil water emergency).			
Violation Type	Violation Begin	Violation End	Violation Explanation
PUBLIC NOTICE RULE LINKED TO VIOLATION	09/15/2019	09/26/2019	We failed to adequately notify you, our drinking water consumers, about a violation of the drinking water regulations. Notification was sent 15 days late.

Total Trihalomethanes (TTHM)			
Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.			
Violation Type	Violation Begin	Violation End	Violation Explanation
MCL, LRAA	07/01/2019	09/30/2019	Water samples showed that the amount of this contaminant in our drinking water was above its standard (called a maximum contaminant level and abbreviated MCL) for the period indicated. The TTHM violation was 1.9 parts per billion over the MCL. The District installed another chlorine feed system for the clearwell which allows the control of the amount of chlorine in the finish water. Since chlorine is a major contributor to high levels of TTHM, these additional controls have since brought the level of TTHM to well below the MCL.

PROTECT ALL THE SKIN YOU'RE IN

U.S. Department of
Health and Human Services
Centers for Disease
Control and Prevention

Use a Layered Approach for Sun Protection.

Sunscreen works best when used with shade or clothes, and it must be re-applied every 2 hours and after swimming, sweating, or toweling off.

Use broad spectrum sunscreen with at least SPF 15 to protect exposed skin.

Wear a hat, sunglasses, and protective clothing to shield skin.

Seek shade, especially during midday hours.
